Workshop for the Deep Space Test-Bed for Radiation Shielding Studies

The planning for the Deep Space Test-Bed Definition workshop is progressing. The purpose of this meeting is for the direct exchange of information and ideas regarding the DSTB definition and design. Based on responses to the first circular a primary and alternate date for the workshop has been selected and the distribution list has been expanded. Please confirm that you or a co-investigator will be available for these dates. The workshop is expected to last approximately 1.5 days. Additional information regarding the meeting will be circulated soon together with logistical information regarding accommodations and meeting location. The first circular is included as an attachment and describes the purpose and goals of the meeting.

Workshop Dates:

| | |
|-----------|-------------------|
| Primary | June 9 & 10, 2003 |
| Alternate | May 5 & 6, 2003 |

Sincerely,
Mark Christl/SD50
